## FOUNDRY KITCHEN & BAR

At Foundry Kitchen & Bar we feel a connection to the industries that use fire and metal to transform raw materials into tangible products. The Madison Williams Foundry that operated in Port Perry from the late 1800s to the early 1900s, crafted steam turbines for the ships that travelled the Trent Severn waterway, enriching our historic community. Foundry Kitchen & Bar uses fire and metal to craft memorable cuisine and experiences from fresh raw materials produced by our neighbours. In the spirit of the Foundry, we work every day to enrich our community through good food, conversation and friendship.
